

INCLUSIVE SPORT AND PHYSICAL RECREATION RESEARCH OPPORTUNITY

ADAPT Lab
@ U of T

Adapt Lab for Accessible and Inclusive Physical Activity

What is the purpose of this research?

Wheelchair Skills Training is an important resource for teaching wheelchair users skills needed for everyday life activities, including engagement in sport and recreation. **The purpose of this research** is to discover what sport and recreation professionals know about wheelchair skills training to begin the transition of skill development from hospital to community settings.

What will I do as part of this research?

Eligible professionals will be asked to participate in a one hour-long semi-structured interview that can be done in-person or virtually. During this interview, participants will be asked questions about their professional background, their knowledge and understanding of wheelchair skills, and resources and approaches that best help them to learn new information.

Who is eligible to participate in this research?

To be eligible to participate in this study, individuals must:

- Work in a community-based sport or physical recreation setting (out-patient rehab & research centres are acceptable)
- Have at least three months experience working in their field
- Speak English
- Be at least 18 years of age
- Be able to attend an in-person or zoom meeting

If interested, or if you have any questions, please contact the student researcher on this project:
